

## Fluke Trade-In Program

### Terms and Conditions

#### 1. Program Description

Eligible customers of Fluke Electronics Corporation (“Sponsor”) who participate in the 2026 Fluke Trade-In Program (“Promotion”) during the Promotion Period (as defined in Section 3) and meet all the requirements as set forth in these terms and conditions of the Promotion are eligible to trade in a qualifying product (Qualifying Trade-In) and purchase an eligible new Fluke product (Qualifying Product) at a savings of up to 15% off the current local list prices in the United States.

#### 2. Eligibility

For purposes of the Promotion, a customer must be located inside one of the 50 states of the United States or the District of Columbia and be at least 18 years of age.

Only customers who are end-users and use the Qualifying Trade-In for their own purposes are eligible to participate in the Promotion. Distributors, resellers, and similar parties are expressly excluded from participation in the Promotion.

Employees, directors and officers of the Sponsor, its parent companies, affiliated companies, subsidiaries, distributors, representatives, and those persons’ immediate families (parents, siblings, children and spouse) and persons living in the same household (whether related or not) are not eligible to participate in the Promotion. Further, no employees, officers, directors, representatives or agents of (i) government entities, including government owned or controlled companies, (ii) distributors or (iii) competing tool manufacturers are eligible to participate in the Promotion.

#### 3. Promotion Period

In order to qualify for the Promotion, an eligible customer must purchase a Qualifying Product and indicate the Qualifying Trade-In during the Promotion Period.

The Promotion Period starts at 12:00 AM on February 3rd, 2026, and ends at 11:59 PM on January 31st, 2027 (all times Pacific Time).

Pacific Time shall control for all purposes of the Promotion.

#### 4. Instructions on How to Participate in the Promotion

(a) Select the Qualifying Trade-In from the table below. The Qualifying Trade-In does not have to be in working order but it must represent the entire physical model.
